The First Workshop on ElecTrans (Electric Transportation) will be held on September 15 – 17, 2010, at Yousung Hotel, Daejeon, Korea.

ElecTrans 2010 focuses on defining new problems and developing novel services for electric transportation issues. The workshop provides researchers and engineers from diverse community with the opportunity to present new ideas and technologies.

ElecTrans 2010 invites original contributions on all topics related to Networking for Smart Grid and especially electric smart transportation, including, but not limited to:

- Information and Communications Theory for Power Systems
- Intermodal Transportation Schedule
- Intelligent Service for the Electric Vehicles
- In-Vehicle Communication and Control
- Vehicle-to-Electric Grid Communication and Control System
- Interoperability among diverse Smart Grid Networks

Meeting the requirement of the main conference, all papers should be submitted by online system for review (at least 2 pages, max 16 pages in LNCS format. Extended Abstract Or Full Paper, any case is OK).

Accepted papers will be included in the conference proceedings published by CPS of IEEE CS (indexed by EI / ISTP / IEEE Xplore and others, confirmed) and CCIS of Springer (indexed by SCOPUS and others, confirmed), and distributed at the conference site.

**Important Dates**
- Submission Deadline: June 29, 2010
- Authors Notification: July 10, 2010
- Final Submission and Registration Due: July 20, 2010

**Chair**
Prof. Junghoon Lee, Jeju National University, Jeju Island, Korea
jhlee@jejunu.ac.kr

**Committee**
Dr. In-Hye Shin, Jeju National University, Republic of Korea
Dr. Mkyung Kang, ISI, University of Southern California, USA
Prof. Sang-Wook Kim, Hanyang University, Republic of Korea
Dr. Mira Yun, The George Washington University, USA
