

Young H. Cho

Last Updated 06/29/11

Address: Informatics Division
Information Sciences Institute - University of Southern California
4676 Admiralty Way, Suite 1001
Marina del Rey, CA 90292
Telephone: 310-448-9107 (cell: 818-263-3542)
E-mail: younghch@usc.edu
Web page: <http://www.isi.edu/~youngcho>

EDUCATION

- 2005-Ph.D. Electrical Engineering
University of California, Los Angeles, Los Angeles, CA
Supervisors: W.H. Mangione-Smith (Chair), G.J. Pottie, L. He, G. Reinman
Thesis: Deep Content Inspection for High Speed Computer Networks
- 2001-M.S. Electrical and Computer Engineering
University of Texas at Austin, Austin, TX
Supervisor: B.L. Evans (Chair)
Thesis Report: Implementation of a 3-D Sonar Beamformer using Quad PPC G4
- 1996-B.A. Computer Science
University of California, Berkeley, CA
Research Supervisors: David Patterson, David Culler

EMPLOYMENT

RESEARCH ASSISTANT PROFESSOR – University of Southern California – April 2011 to Present
Department of Electrical Engineering (Joint Appointment)

RESEARCH ASSISTANT PROFESSOR – University of Southern California – July 2009 to Present
Department of Computer Sciences

- Prepare and submit proposals for R&D grants
- Responsible for leading research team for established government and private contracts
- Advise Ph.D. and M.S. graduate students
- Teach computer science/electrical engineering courses

Key Achievements:

- 11 accepted competitive technical conference and journal publications
- 7 accepted and 3 pending grant proposals

RESEARCH SCIENTIST – USC – Information Science Institute – September 2008 to Present
The Network Division (Division7)

- Prepare and submit proposals for R&D grants
- Devise and negotiate cooperative contracts with research institutions and companies
- Responsible for leading research team for established government and private contracts
- Write and submit publications to peer reviewed conferences and journals

Key Achievements:

- 18 accepted publications

POSTDOCTORAL RESEARCHER – University of California, Los Angeles – August 2007 to August 2008
Department of Electrical Engineering – Member of Networked & Embedded Systems Laboratory (NESL) and Center for Embedded Networked Sensing (CENS)

- Prepare and submit proposals for R&D grants
- Devise and negotiate cooperative contracts with research institutions and companies
- Responsible for leading research team for established government and private contracts
- Advise Masters and Doctoral Electrical Engineering students in their research
- Mentor and Instruct laboratory Interns
- Write and submit publications to peer reviewed conferences and journals

Key Achievements:

- 2 patents pending
- 4 competitive technical conference and journal publications
- DAC 2008 - Design Competition Winner (Advisor)

VISITING PROFESSOR – Washington University in St. Louis – Jul 2005 to Jun 2007

Dept. of Computer Sciences and Engineering – Member of Applied Research Laboratories

- Responsible for leading research team for contract with Disruptive Technology Office
- Design high-speed network content parsing, classification, and clustering system
- Qualitative analysis of the pre-existing system and modification for field operation
- Advise Masters and Doctoral Computer Engineering students in their research
- Instruction in Graduate-level Computer Architecture course offered at the university

Key Achievements:

- Successful development of multi-Gbps e-mail content parsing system
- Designed functional prototype of multi-Gbps content based network router, payload classification, and clustering system
- Development of novel architecture to enable optimal FPGA design performance with safe operating temperature
- Over 15 competitive technical conference, journal, and book chapter publications

GRADUATE RESEARCH ASSISTANT – University of California, Los Angeles – Sep 2001 to Jun 2005

Dept. of Elec Engineering – Compiler and Architecture Research for Embedded Systems

- Research and development in high-performance Network Intrusion Detection Systems
- Design novel architectures for scalable high-speed pattern matchers
- Instruction and Assistance in Upper-division Computer/Electrical Engineering courses

Key Achievements:

- Successful development of multi-Gbps pattern matcher using FPGA and ASIC
- Designed a novel high-performance processor for context free grammar parsing
- 7 competitive technical conference and journal publications
- 1 licensed International patent of pattern matching technology
- 2 patent pending for novel network intrusion detection system technologies

COMPUTER CONSULTANT – U.B. Video, Vancouver, B.C. – Apr 2000 to Aug 2000

Video Compression and Streaming Technology Company

- Research and development of image compression API for image foveation algorithms

Key Achievements:

- Demonstration of image tracking and fast foveation algorithm on real-time video streams

GRADUATE RESEARCH ASSISTANT – University of Texas, Austin – Aug 1999 to Dec 2000

Department of Electrical and Computer Engineering – Applied Research Laboratories

- Research in 3-D Sonar Beamforming Algorithm (AltiVec and Sun VIS)
- Evaluate hardware and software research platforms (Quad PowerPC G4)

Key Achievements:

- Demonstration of accelerated beamforming algorithm using PowerPC AltiVec extensions
- Thorough analysis of the performance bottlenecks and defined platform recommendations
- 2 competitive technical conference and journal publications

RESEARCH ENGINEER/PROGRAMMER – Myricom, Inc. – Jul 1996 to Aug 1999

High Performance Computer Network Company – Creator of Myrinet

- Research and development in distributed FPGA based two-level multi-computer
- Development of high-speed Myrinet networking appliances
- Development of high-performance network testing appliances

Key Achievements:

- Developed several Myrinet commercial products such as Myrinet to Fiber optics converter, Oct Switch, and SAN to LAN converter

- Developed a number of Myrinet test equipments including LANai processor functional test system and FI device tester
- Developed a number of board layout and logic synthesis CAD tools
- Implemented high-performance Automatic Target Recognition system using FPGA based Myricom two-level multicomputers
- 1 competitive technical conference publication

RESEARCH ASSISTANT – University of California, Berkeley – January 1994 to June 1996
Department of Electrical Engineering and Computer Science

- Research in Networks of Workstation (NOW) under David Patterson and David Culler
- Software and Hardware design and support

Key Achievements:

- Designed and built HP/Myrinet Interface
- Embedded system test software

TEACHING EXPERIENCE

Courses Taught

USC

- CSCI 558L – Graduate Internetworking and Distributed Systems Laboratory

Washington University in St. Louis

- CSE 560M – Graduate Computer Architecture I

UCLA

- CS M152B – Computer Architecture Laboratory (T.A. for Prof. D. Rennels)
- EE 116B – VLSI Course (T.A. for Prof. M. Srivastava)
- EE 115C – Digital Electronic Circuits (T.A. for Prof. B. Daneshrad)

UC Berkeley

- CS 152 – Computer Architecture (T.A. for Prof. D. Culler)
- CS 152 – Computer Architecture (T.A. for Prof. D. Patterson)
- Computer Architecture Seminal for Re-entry Students (Instructor)

Student Advising/Mentoring

Graduates:

Aarti Lolage (graduated from USC with MS in May 2010)

Todd Sproull (graduated from WashU with PhD in Aug 2009: Lecturer at Washington University in St. Louis)

James Moscola* (graduated from WashU with PhD in April 2008; Lecturer at Washington University in St. Louis; also employed at Bledex, a start-up research company)

Phillip Jones (graduated from WashU with PhD in Jan 2008: Tenure Track Assistant Professor at Iowa State University)

Andrew Levine (graduated from WashU with MS in June 2007)

Current Students:

Andrew Goodney (PhD - USC), Jonathan Friedman (PhD - UCLA), Shailesh Narayan, Vivek Bhandwalkar, Bogeun Kim, Kyung-Heum Cho (MS - USC)

* Ph.D. Committee Chair

HONORS

Design Automation Conference Student Design Competition Winner (advising faculty) – 2008

The Best Paper Award – IEEE VLSI Design 2007

John Deere Scholarship, UCLA – 2003

UCLA EE Departmental Fellowship, UCLA - 2002

Altera University Scholarship, UT Austin – 1999

Award of Recognition in Excellency as Teaching Assistant, UC Berkeley – 1996

PROFESSIONAL ACTIVITIES

Refereed Conference Service

- TPC for 1st Asia NetFPGA Developers workshop – 2010
- TPC for 5th Workshop on Secure Network Protocols – 2009
- IEEE Globecom Session Chair – 2005

Refereed Conference Paper Reviewer

- IEEE Transactions on Parallel and Distributed Systems, IEEE Transactions on Computers, IEEE Transactions on VLSI, IEEE Journal on Selected Areas of Communications, International Journal of Security and Networks, IEEE Transactions on Dependable and Secure Computing, ACM Transactions on Embedded Computing Systems, IEEE/ACM International Symp. On Microarchitecture (MICRO), ACM FPGA, EURASIP JES, IEEE Field Programmable Logic, IEEE International Symposium on Circuits and Systems

Membership

- IEEE (EE) and ACM since 1999

COLLABORATORS AND OTHER AFFILIATIONS

A. Collaborators and Co-authors

Prof. Ramesh Govindan (USC), Prof. William Kaiser (UCLA), Prof. Deborah Estrin (UCLA), Prof. Mani Srivastava (UCLA), Prof. Jeremy Buhler (WashU), Prof. Roger D. Chamberlain (WashU), Prof. Ron Cytron (WashU), Prof. Andre Dehon (U. Pennsylvania), Prof. Scott Hauck (U. Washington), Prof. John W. Lockwood (WashU/Stanford), Prof. William Mangione-Smith (UCLA/Intellectual Ventures), Danny Cohen (Caltech/Myricom/Sun), Dr. Ruth Sivilotti (Myricom), Dr. Wen-King Su (Myricom), Dr. Doyle Weishar (i_SW Corp), Dr. John Byrns (Fair Issac), Dr. Alan Ratner (National Security Agency), John Wroclawski (ISI), Dr. John Heidemann (ISI), Dr. Terry Benzel (ISI)

B. Research Advisors

Primary PhD Thesis Advisor: Prof. William Mangione-Smith (EE, UCLA)

Other PhD Thesis Committee: Prof. Greg Pottie (EE, UCLA), Prof. Lei He (EE, UCLA), Prof. Glenn Reinman (CS, UCLA)

Primary MS Thesis Advisor: Prof. Brian Evans (ECE, UT Austin)

Other Research Advisors: Prof. David Culler (EECS, UC Berkeley), Prof. David Patterson (EECS, UC Berkeley), Dr. Charles Seitz (Caltech/Myricom), Dr. Danny Cohen (Caltech/Myricom/Sun)

C. Post-graduate Mentors/Sponsors

Prof. Mani Srivastava (UCLA), Prof. Deborah Estrin (UCLA), Prof. John W. Lockwood (WashU)

GRANTS

- Current: USC Research Innovation Funding – Microtomography – June 2011 to May 2012, Amount: \$10,000 – USC PI: Young H. Cho
- Current: CISOFTE Pervasive Thermoelectric Generation – Chevron – January 2011 to December 2011, Amount: \$100,000 – USC PI: Young H. Cho.
- Current: Green Edge Networks – NSF CISE Cross Cutting – September 2009 to August 2012, Amount: \$600,000 – USC PIs: Ramesh Govindan, Young H. Cho, UCLA PIs: Mani Srivastava, and William Kaiser.
- Pending Decision: USC Ideas Empowered - Cyber-Physical Sensor based Cyberspace Interface for Older Adults – PIs. Young H. Cho, Jihie Kim, and Merrill Silverstein
- Pending Decision: NIH Social Network for Assisted Living Facilities – PIs. Young H. Cho, Jihie Kim, and Merrill Silverstein
- Past: CISOFTE Rapid Problem Detection – Chevron – January 2010 to December 2010, Amount: \$125,000 – USC – PIs: Young H. Cho and John Heidemann.
- Past: CISOFTE Rapid Problem Detection – Chevron – January 2009 to December 2009, Amount: \$100,000 – USC – PIs: Young H. Cho and John Heidemann.
- Past: CISOFTE Underwater – Chevron – January 2008 to December 2009, Amount: \$200,000 – USC – PIs: John Heidemann and Young H. Cho.

- Past: Satellite Sensornet Gateway – NASA Advanced Information Systems Technology Program – October 2006 to September 2009, Amount: \$1,489,891 – USC – PIs: Young H. Cho and Terry Benzel.
- Past: Fast Semantic Content Processing – Air Force/NSA/Science Applications International Corporations (SAIC) - April 2006 to December 2006, Amount: \$334,092 – Washington University in St. Louis – PIs: John W. Lockwood, Young H. Cho and Ron Loui.

PATENTS

1. "Oscillator based Drift Compensation Resonator and Timer," UCLA Case No. 2008-769, Inventors: Young H. Cho, Zainul M. Charbiwala, Thomas Schmid, Jonathan Friedman, Mani B. Srivastava; Applicant: University of California, Submission Date: May 23, 2008.
2. "Highly Stable Software Compensated Oscillator," UCLA Case No. 2008-356, Inventors: Young H. Cho, Thomas Schmid, Zainul M. Charbiwala, Mani B. Srivastava; Applicant: University of California, Submission Date: November 23, 2007.
3. "High-Performance Context-Free Parser for Polymorphic Malware Detection," International Patent No: WO2006113722; Inventors: Young H. Cho and William Mangione-Smith; Applicant: University of California, Publication Date: October 26, 2006.
4. "Method And Apparatus For Deep Packet Inspection," International Patent No: WO2006031496; Inventors: Young H. Cho and William Mangione-Smith; Applicant: University of California, Publication Date: March 23, 2006.
5. "Programmable Hardware for Deep Packet Filtering," International Patent No: WO2005104443, EP173853; Inventors: Young H. Cho and William Mangione-Smith; Applicant: University of California, Publication Date: November 3, 2005. International and U.S. Patent Issued on April 2011.

PUBLICATIONS

Book Chapter

- B1. Young H. Cho, "Automatic Target Recognition Application using Field Programmable Gate Array," as part of Reconfigurable Computing: The Theory and Practice of FPGA-Based Computation by Scott Hauck and Andre Dehon, Morgan Kaufmann, Nov. 2007.

Refereed Journal Publications

- J5. Thomas Schmid, Roy S Shea, Zainul M Charbiwala, Jonathan Friedman, Young H Cho, Mani B Srivastava, "On the Interaction of Clocks, Power, and Synchronization in Embedded Sensor Nodes." ACM Transactions on Sensor Networks (TOSN), March 2010
