

2 August 2026

I've had the pleasure of working with Terry in the Computer Society Board of Governors and Executive Committee for the past three years, and I can attest to her drive, focus, and experience. She is uniquely qualified, with the special blend of computing-domain expertise, professional leadership, and organizational savvy needed to lead the Computer Society.

Terry's vision for the future of the Society helps us continue to build the professional home that gives us all a sense of belonging, value, and place in our professions. With Terry's leadership as President-Elect, we will all enjoy an ever-more inclusive experience that gives every member an opportunity to achieve their goals and contribute to building the future of technology.

As a 25-year professional member of the IEEE Computer Society, I am pleased to support Terry Benzel's candidacy for IEEE Computer Society President-Elect.

A handwritten signature in black ink, appearing to read 'Andrew Seely', with a long horizontal flourish extending to the right.

Andrew Seely (he/him)
